*Reasons for Allowance*

1. The following is an examiner's statement of reasons for allowance:

The closest prior art of record is WO 92/13316 to Horie.

Horie discloses an information recording card, which stores usage information and group ID data for discriminating the group who uses the card. Horie's system comprises a discrimination section that reads the registered group ID data from a table, compares it to the group ID data of the information recording card stored in the buffer memory, and sends the comparison result to a process control section. At this time, in the case wherein the group ID data stored in the common table coincides with group ID data on the information recording card, the group using the information card is identified as the registered user. Horie taken either individual or in combination with other prior art of record fails to teach or suggest defining a single system key that is shared by said plurality of groups and completing a transaction with said purse card only if the key on the purse card matches said single system key and the float ID read from the purse card specifies a user group supported by said system as recited in independent claim 12,18 and 24.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

*Conclusion*

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 3621

- US Patent No. 6915434 to Kuroda et al. discloses a storage apparatus that includes a key management unit for managing an individual key unique to the apparatus and a common key shared with other storage apparatuses.
